

The FWD Outlaw Shootout Lives On.

July 20-21 sees the Injector Dynamics FWD Outlaw Shootout at Shakespere County Raceway and although the ETs are not quite up to USA levels, here in the UK the event is more exciting than ever with eight mid-to-high nine second cars in a field of thirteen.

As well as the outright performance, some of the top eight have shown outstanding consistency in events leading up to the Outlaw Shootout. So there is going to be some close and exiting racing.

Here are a few links to come competitors past runs.

What is unique about the UK's FWD drag racing, which sets us apart from the rest of the world, is that although we do have some Honda EG (B series) powered cars, the field is also made up of a wide range

of vehicles such as Honda Civic EP3s, Mitsubishi FTO, Rover MGZR Turbo, Renault 5, Vauxhall Corsa, Vauxhall Tigra and BMW Mini.

Due to the generosity of our sponsors we will be battling it out for the best prize fund available in Europe for this kind of race, so a huge thank you to these guys for their support.

With now less than one week left until the race the internet seems to have gone a little quiet, so presumably racers are burning the candle at both ends putting motors and transmissions together at the last minute (it wouldn't be the same any other way would it?)

Good luck to all the competitors and their crews.
